Solve all your shelf labelling problems with our Perfect shelf labelling solution

Look out for the “L” symbol. It means that the signs shown are designed to fit our shelf label holders.

Shelf label holders a “must have” for libraries

- Shelf label holders are designed to run along the full length of each library shelf.
- Peel off adhesive backing and position the transparent holder on your shelf. Once adhered, holder becomes a permanent part of the shelving.
- Labels are placed in the holder via an opening on the top edge, ensuring complete protection for labels.
- Labels can be easily relocated to move a few centimetres or to a new shelf without any deterioration.
- Label holders available in two widths to suit a wide range of shelving types.

Choosing the correct size

- Measure the height of the front lip of your shelving.
- If your shelf measures 26mm or more, you will need to order 26mm shelf label holders. If your shelf measures between 17mm and 25mm you will need to order 17mm shelf label holders.
- Count the number of shelves in your library. The total number of shelves equates to the number of holders you need to order.
eg: 60 shelves = 60 label holders.
